

SENIOR FULLSTACK DEVELOPER

KUMOJIN IS LOOKING FOR A SWISS KNIFE OF THE DEVELOPMENT

BACK-END | FRONT-END

RH@kumojin.com

To meet the growing needs of our customers, we need to complement our teams with the expertise of a ✨ senior FullStack developer ✨. We are looking for a versatile developer who is as competent in Front-End as in Back-End. And, if this specialist also has DevOps expertise, then we cannot wait to meet him or her.

We are looking for someone who is tech-savvy, resourceful and sociable. We would like to grow our team by adding to it passionate professionals who are willing to support us in our mobile and web application development projects for our international customers. Our clientele comes from multiple various industries: geospatial sector, e-commerce, catering, AI, video-conferencing and other.

This new developer will help us to successfully accomplish challenging and innovative tasks related to our projects. At Kumojin, we like to challenge the status quo and develop applications using a “clean code” approach while, at the same time, offering services adapted to business realities of our customers.

The position is currently 100% teleworking but as soon as it is possible to return to the office, we have nice workspace in Saint-Roch district of Quebec. It is also worth mentioning that employees were able to work remotely even before the pandemic, and, if you work with us, it will be certainly possible to continue working from home after the pandemic.

WHAT WE ARE LOOKING FOR 📌

- 3 to 5 years of experience in a Back-End program: Node.js and/or Java and/or Golang
- 3 to 5 years of experience in Front-End program: React and/or Angular and/or Vue.js or other JavaScript framework / library
- Any other technology is an asset
- Familiar with the TDD, CI / CD approach and development best practices
- Experience with Cloud providers (AWS, Azur, GCP) is an asset
- A good communicator able to work in French and English
- An autonomous, rigorous, resourceful and organized person
- A passionate team player eager to bring new ideas

Kumojin

WHAT YOU CAN HAVE FUN ON 📌

- Develop web and mobile applications in different languages
- Create and maintain integration and deployment pipelines using Docker and Kubernetes for those who have DevOps expertise.
- In practice, this involves analysis, development, architecture and communication between our team and the client.
- You will be able to touch on all spheres by getting involved from the start of projects through technical analysis, the process of estimating requests and guiding our clients in their approach.
- As our approach is agile, we want to facilitate the transmission of requests and the execution of tasks by allowing you to be in direct contact with the client.
- At Kumojin, we follow the precepts of *clean code* very closely and our teams work in *test-driven development* while ensuring the security and performance of their deliveries. We like the quality!
- In summary, if you want to have a real impact on the developments you do, you like technical challenges, your operating method is solution-oriented, and routine is not something you enjoy, we will certainly love working at Kumojin!

WHAT WE OFFER TO OUR EMPLOYEES 📌

- **A way of life :**
 - FLEXI-HOUR and VARIABLE HOURS to allow you to reconcile work, family, projects and relaxation.
 - 5 weeks of paid leave + 2 flexible days upon arrival to have time for you and your loved ones. Your well-being is extremely important for us!
 - The possibility of working from anywhere, as long as you stay in Quebec.
- **Recognition :**
 - Competitive compensation assessed and reassessed regularly according to your expertise and experience.
- **Daily serenity, but also for your future:**
 - Group insurance.
 - A group RRSPs and a DPSP because we like our employees to contribute to our success.
- **Lots of little extras that make the difference**
 - A monthly bus pass.
 - Unlimited coffee and tea in our offices.
 - Training and personal development.
- **And a lot of fun:**
 - We make sure that our teams have fun on the projects they are working on. If not, we discuss it together and find solutions.
 - As soon as possible, the possibility of coming to work in our office in Saint-Roch district to enjoy a great team atmosphere and bright open-plan offices.
 - And we always find a good reason to spoil our teams: a 5@7, delivery of sweet to home or anything else... all occasions are good.

We invite you to contact us to 📧 RH@kumojin.com 📧 and tell us more about yourself and what you are looking for.
